In the Claims:

Please cancel claim 17.

Please amend claims 1, 13 and 18 as follows;

- 1. (Amended) A liquid bleaching composition comprising an organic substance which forms a complex with a transition metal, the complex catalysing bleaching of a substrate by atmospheric oxygen without use of aldehydes, and a liquid carrier or solvent, wherein the composition allows at least 50% of any bleaching of the substrate to be effected by oxygen sourced from the air and is substantially devoid of peroxygen bleach or a peroxy-based or -generating bleach system.
- 13. (Amended) A method of bleaching a substrate comprising applying to the substrate a liquid bleaching composition that comprises an organic substance which forms a complex with a transition metal, the complex catalysing bleaching of the substrate by atmospheric oxygen without use of aldehydes, and a liquid carrier or solvent, wherein the composition allows at least 50% of any bleaching of the substrate to be effected by oxygen sourced from the air and is substantially devoid of peroxygen bleach or a peroxy-based or -generating bleach system.

13 186 18. (Amended) A method of treating a textile by contacting the textile with a liquid bleaching composition that comprises an organic substance which forms a complex with a transition metal, the complex catalysing bleaching by atmospheric oxygen without use of aldehydes, and a liquid carrier or solvent, wherein bleaching by the composition in a wash liquor is to at least 50% effected by oxygen sourced from the air and the composition is substantially devoid of peroxygen bleach or a peroxy-based or -generating bleach system, whereby the complex catalyses bleaching of the textile by atmospheric 50/oxygen after the textile has been removed from the wash liquor and dried.

Please add new claims 22, 23 and 24 as follows:

- 22. A liquid composition according to claim 1 wherein the composition allows at least 90% of any bleaching of the substrate to be effected by oxygen sourced from the air.
- 23. A method according to claim 13 wherein the composition allows at least 90% of any bleaching of the substrate to be effected by oxygen sourced from the air.
- 24. A method according to claim 18 wherein bleaching by the composition in the wash liquor is to at least 90% effected by oxygen sourced from the air.
